

Investigate, Make, Create is an approach targeted for Middle, Senior students, sparking curiosity and igniting passion projects.

Are you an advocate for inquiry learning, questioning and wondering?

Do you want your students hands on making and creating to solve real world problems?

Do you want to infuse the Digital Technologies Curriculum, robotics and coding?

Join me for either a face to face or a virtual workshop in 2021.

[Register via Eventbrite](#)

Or email me to host an event or teacher only day at your school.
